

Remarkable Enterprises Ltd.

Address: 8460 Sunnywood Drive,
Richmond Canada, VGY, 3G5

Certificate of Recommendation

This is to certify that **Rea Princess T. David** was employed at **Remarkable Enterprises as Tactical Arbitrage Specialist** from March 6, 2023 to May 29, 2025, was responsible for designing, managing, and continuously optimizing our Tactical Arbitrage (TA), Tactical Bucket (TB), and Tactical Expander (TE) systems—critical components in our sourcing infrastructure.

Ms. David demonstrated strong ownership and initiative in designing optimized scanning schedules, ensuring that high-value websites and competitor storefronts were scanned with the ideal frequency to maximize ROI while avoiding redundancy. She displayed an advanced understanding of how to analyze site architecture to determine the most effective scanning methods, customizing strategies for each unique platform.

One of Ms. David's key strengths was her technical acuity in maintaining and refining bulk lists, xPaths, and TA settings. She ensured that scans ran smoothly and quickly resolved any issues—whether through internal troubleshooting or by directly coordinating with software providers. Her monitoring of Watch Logs and proactive parameter adjustments significantly reduced “No Product” scan results, leading to a higher volume of qualified product submissions.

In addition to the technical side, Ms. David also contributed meaningfully to team collaboration and documentation. She kept all TA, TB, and TE workflows meticulously documented in Notion, created a reliable troubleshooting guide for the team, and maintained daily sourcing logs and accomplishment reports with consistency and clarity. Her work enabled faster onboarding for new team members and minimized downtime during process transitions.

Her collaborative spirit was evident in daily team meetings and cross-functional projects. Ms. David's regularly engaged with the Sourcing team to gather feedback on scan results and used those insights to add new high-opportunity sites to our Tactical Arbitrage ecosystem. This feedback loop directly enhanced the volume and quality of sourcing submissions.

Finally, Ms. David had a strong focus on continuous improvement. She used data analysis to enhance scan efficiency and strategically adapted scanning methods based on seasonality, market changes, and evolving business goals. This dynamic, proactive mindset made her an invaluable asset in a fast-paced, data-intensive environment.

In summary, Ms. David is a technically skilled, analytically minded, and process-driven professional who excels in automating and enhancing sourcing workflows. We highly recommend her for any role involving eCommerce operations, sourcing automation, or data optimization.

Issued this 6th day of June 2025, 20, for whatever legal or professional purpose it may serve.
